[The varieties of the suffix make the exact origin somewhat obscure: the forms in -ur, -our, -or, -er, -ar, point to an AF. or OF. **teyntour*, L. **teyntor-em* stretcher, agent-n. from *tend-ere* to stretch, which suits the sense; but neither the OF. nor the L. word is known in the sense 'tenter'.

The rare form *teynture* is equated by PROMP. PARV. with L. *teyntura*, but this ought to mean the process of stretching or its product of F. *teynture* action of stretching, also tapestry hangings; which does not agree with the sense of 'stretching instrument or apparatus'. On the other hand, if the word were merely an Eng. agent-n. from T^{ENT} v¹, it would be difficult to account for the various forms of the ending. The forms in *teynt-*, *teynt-*, *teynt-*, *teynt-* also offer difficulty, suggesting some association with F. *teint* dye.]

the tenth-rate kind 1905 *Westm. Gaz* 28 Mar. 4/1 Constable is too remote and difficult, but a *tenth remove derivative, properly browned, will serve their turn

[Note 1] The etymological history of some of the prec. forms (as in other numerals) presents points of which the explanations are more or less conjectural. The direct O.Tent. repr of Indo-Eur. **dehinto* s was by Verner's Law **dehinto* s, with this the Gothic *teihunda*, OS. *tehandu*, OHG *tehandu*, agree, except in having *h* for *g*, apparently under the influence of the cardinal **tehu*, -au. The O.Tent. **dehinto* s, whence OS and OFris. *tehu*, -au, O.Anglian *teodgifu*, implies a pie-Tent. **dekin* tos, with shifted stress (implied also in some other ordinals). Assimilation of this form also to the cardinal would give **tehu*mpa, whence *tehu*mpa, *tehu*mpa, *tehu*mpa. The history of *tehu* is more uncertain the four ordinals, *sefende*, *ezende*, *nezeude*, *teude*, in ME, Northern and Kentish, form a group of which only the first is known in OE, repr by *seofunda*, *seofunda*, in the Lindisf. and Rushw glosses. *Seofunda*, like Goth. **sebanda*, OS *sihunda*, OHG. *sihunda*, represents an O.Tent. **sihunda*, Indo-Eur. *sephinto* s OE. *sefenda* (a 1066), OS *sefunda*, OHG *sefunda*, Goth. *sefunda*, had prob a parallel history. The ME. *sefende* appears to have been conformed in its ending to *sefende*; and *teude*, from its late appearance, was prob. formed from *teu* on the same model. *Teu*-th has the suffix which in OE appears in *seofu*, *seofu*, *cahtu*, *seofu*, *seofu*, *seofu*, and which has now been extended to all the ordinals from fourth onward. On the other hand, *teu*-t has the form of the suffix which was regular in OE. *fiftha* (OS. and OFris. *fiftha*, -ia, OHG *fiftha*, Goth. *fiftha*, O.Tent. **fiftha*), and *sixta* (OS. and OHG *sixta*, Goth. *sixta*, O.Tent. *sexta*), which in OE was also used in *eleftha* (eleftha) and *twelfta*, and in North and North-Midland dialects has since been extended to all the ordinals from fourth to hundred.]

6. *Law.* An estate or interest in land, etc. for a certain period; in full, *term of* or *for years*.

Outstanding term, Satisfied term. An estate for a long term of years was given, usually to the trustee of a strict settlement, to secure to beneficiaries under the settlement the payments due to them periodically from the tenant of the settled land. If these payments were not made, the trustees could take possession of the land for the term, and sell or mortgage it, to raise the money needed to make them. When the purposes for which the estate was created were fulfilled (e.g. by the death of all the beneficiaries) it was called a *satisfied term*; but unless express provision had been made that it should then cease, or unless it was conveyed to the tenant of the freehold so that it was destroyed by merger in the freehold, it continued to exist for the period for which it was created. It was then known as an *outstanding term*, or an *attendant term*, i.e. a term accompanying the inheritance. By Act 8 & 9 Vict. c. 112 provision was made for the cessation of satisfied terms.

[Note to branch IV Gr opor denoted 'boundary mark' and thence 'a boundary', as in Euclid (see 1570 in sense 1). Hence in Arithmetic, applied to each of the terms in a ratio, e g 2 4, also in a proportion, and in any related series of numbers, in the statement of a mean between two numbers, as 6 9 12, 6 and 12 were the *extremi opor*, 'extreme terms', and, by extension 9 was called *medius opor*, 'the mean term'. In Logic, opor was applied to the terms in an analogy, e g 'as A is to B, so C is to D', where A, B, C, and D were *opor*, also to the terms (subject and predicate) in a proposition, hence to the terms in a syllogism, the major, minor, and middle (the last being analogous to the 'mean term' in Arithmetic). By late Latin philosophical writers, *opor* in the geometrical, arithmetical, and logical senses was rendered by *terminus* (constantly used by Boethius a 524). The application of *opor* and *terminus* to the definition or limitation of a word appears in Petrus Hispanus, and led finally to the application of *terminus* to any word used in a definite or limited sense (as in sense 13 above). In Aquinas (13th c) *terminus* is synonymous with *dictio*, *locutio*, *nomen* (see the Thomas Lexicon s v)]

Terpene (tɜːpiːn), *Chem.* [f. *terp-* in *terp-entum*, *obs. f. TURPENTINE*, with suffix *-ENE*, used in forming the names of hydrocarbons related to **BENZENE**. Formerly called **TEREBENE**.] A general name of hydrocarbons having the formula $C_{10}H_{16}$, many of which occur in the volatile oils of plants, chiefly of the coniferous and aurantiaceous orders. The commonest is **PINENE**, the chief constituent of turpentine-oil.

Sometimes used to include hydrocarbons of formula C_8H_8 , and its polymers $C_{10}H_{16}$, $C_{12}H_{18}$, $C_{20}H_{32}$, etc.

Test act. [See TEST sb 1 3] The name given in English History to various acts directed against Roman Catholics and Protestant Nonconformists; particularly, the act of 1673 (25 Chas II. c. 2) by which the provisions of the Corporation Act of 1661 (see CORPORATION 7) were extended to include all persons holding office under the Crown, and a declaration against transubstantiation was introduced. It was repealed 9 May, 1828.

Also sometimes applied to (a) an act of Elizabeth, 1563, imposing the oath of allegiance, and abjuration of the temporal authority of Rome, on all office-holders except peers, (b) the Corporation Act of 1661; (c) a Scotch act of 1681, exacting a declaration of conformity to the Episcopal Church of all holders of municipal and government offices.

II In Christian Latin use of *testamentum*

Orig. a misuse of the word, arising from the fact that
Gr διαθήκη, 'disposition, arrangement', was applied both
to a covenant (*factum, fadus*) between parties, and to
a testament or will (*testamentum*). Prob. largely due to
the use of διαθήκη (in the sense 'covenant') in the account
of the Last Supper immediately before Christ's death, and its
consequent association with the notion of a last will or
testament. See also historical note s. v. COVENANT sb 7

4. *Script.* A covenant between God and man.

novum testamentum, to the Mosaic and Christian
'covenants' or 'dispensations' (cf. 2 *Cor* iii 6, 14
cited in 4), the term passed in early Christian Latin
(and hence in the languages of the West) to the
books or records of the old and new covenants.

(This transition of sense took place many centuries before
the adoption of the word in English, where the name was
simply taken over from L or Fr in this transferred use.)

† *Tethy*, *a. Obs. rare*. Also 5 *tathy*, *thethy*

Of uncertain origin and meaning.

The sense of *TETHY* a. seems unsuitable. Can it be a corruption, or rather a series of errors, for *Tidy* a., which occurs in this poem (and elsewhere) as an epithet of approval or praise, = good, excellent, worthy, apt, brave, doughty? But such an alteration of vowel and consonant in *tidy* is unknown elsewhere, and is phonetically unwarranted.

L. *Teutonicus Ordo Militaris*, F. *l'Ordre Teutonique*, Ger. *Deutsche Ritter*, in 16th c. *Teutsche Herren*), originally enrolled c 1191 as the Teutonic Knights of St. Mary of Jerusalem, for service in the Holy Land.

Their first seat was at Acre; after the fall of the Latin kingdom of Jerusalem, they settled at Marienburg on the Vistula, and carried on a crusade against the neighbouring heathen nations of Prussia, Livonia, etc. Their conquests made them a great sovereign power, but from the 15th c. they rapidly declined, and were abolished in 1809. The order maintains a titular existence in Austria and Holland.

[Note Late Roman writers reckoned the *Teutones* among the peoples of Germania, and *Teutonicus* became a common poetic equivalent for *Germanicus*. It is now however held by many that they were not a Germanic people. But, before 900, German writers in Latin began to follow Latin poets, precedent by using *Teutonica lingua* instead of the barbarian or non-classical *Thiotisca*, to render the native *deutsch*, *deutsch* (OHG *diutisc*, mod. *deutsch* = OS *thiudisk*, OE *þeodisc*, literally 'national, popular, vulgar') as a designation of their vulgar tongue in contrast to Latin, as if this German adj. were identical with the ancient ethnic name. In 1200 *lingua Teutonica* was similarly used, and thenceforth *Teutonicus* became a usual L. rendering of *Deutsch* or *German*. Some Early German comparative philologists (e.g. Bopp in 1840) used *Teutonicus* as the name for the family of languages including Gothic, German, Scandinavian, and English, but for this *Germanisch* is now more used in German, and *Germanic* by many in English. But in English there is an awkwardness and sometimes ambiguity in using *Germanic* beside *German* (in its ordinary political sense), which does not arise in German or French, where *germanisch* and *germanique* are entirely distinct from *deutsch* and *allemand*. To avoid this, many English scholars prefer 'Teutonic' as the term for the linguistic family, and it is commonly so used in this dictionary.]

TH, in words of Old English or Old Norse origin, and in words from Greek, is a consonantal digraph representing a simple sound, or rather (in Teutonic words), a pair of simple sounds, *breath* and *voice*, indicated in this dictionary by the OE. letters (þ) and (ð); the former, as in *thin, bath* (þin, baþ), being the breath dental spirant akin to *t*, and the latter, as in *then, bathie* (ðen, baðie), the voiced dental spirant akin to *d*. The group *t, d, þ, ð*, corresponds to the group *p, b, f, v*. The breath spirant is identical with modern Greek *theta* (θ, θ), and approximately with Spanish *θ* (oi *c* before *e, i*). The Greek letter, which corresponds etymologically to Sanskrit *dh* (and so, by Grimm's Law, to Teutonic and English *D*), was in early inscriptions represented by **TH**, and was a true aspirate; it was subsequently often written **TΘ**, **τθ**, and had prob. the sound (tþ); but by the second century B.C. it had sunk into a simple sound, = our (þ). The Romans, having neither the sound nor the symbol, represented the letter by **TH**, as in *Θάψος, Thapsus*, but app. this was pronounced, at least in late Latin (whence in all the Romance languages), as simple *t*; cf. Greek *θεωπία, L. theōria*, It. and Sp. *teoría*; in Pg. *theoria*, F. *théorie*, spelt with *th*, pronounced with *t*; also Gr. *Θωμάς, L. Thomās*, It. *Toma*, Sp. *Tomás*; Pg. F., Eng. *Thomas* all pronounced with *T*.

(2) In Teutonic the breath spirant (þ) was very frequent, being the regular etymological representative of Indo-Eur. *t* initially or after the stressed vowel, as in OTeut. *þrīz, Goth. *þreis*, OE *þreo*, Eng. *three*, = Indo-Eur. **treues*, Skr. *trayas*, Gr. *τρεις, L. trēs*, OTeut. *þrōþer, Goth. *brōþar*, OE. *brōðor*, Eng. *brother*, = Indo-Eur. *dhritr*, Gr. *φάτρις* clausman, *L. frāter*. The voiced spirant in *brōðor*, etc., was a later development (c. 700 in English) from the breath sound between vowels or voiced consonants, as in the parallel *v* and *s* from *f* and *s*. Initially, the same change of (þ) to (ð) took place during the Middle English period in the demonstrative group of words, *the, that*, and their kindred, *this, these, þat, those, there, then, than, thence, thither, thus*, etc., and in the pronouns of the second person singular, *thou, thee, thine, thy* these constitute the only words in English with initial (þ). In the same group of words in the cognate Teutonic languages (þ) has passed through (ð) into (d); thus Ger. *das*, Du. *dat*, Da. *det* 'that'; in High Ger., Low Ger., and Du. the same has taken place even in other original *th* words which retain (þ) in English; e.g. Ger. *dach*, *denken*, *ding*, *dick*, *donner*, *drei* = Eng. *thatch*, *think*, *thing*, *thick*, *thunder*, *three*.

(3) In the demonstrative and pronominal groups of words, change of initial þ to t, by assimilation to a preceding dental (t, d, s), appears in earlier English. OE *þæt þe* became *þat þe*, *þat þe* appears in the 11th c. as *þat þe*, whence modern *that*. In the last section of the OE. Chronicle, from 1132, *þe* after *t* or *d* regularly becomes *te* (e.g. *þat te king*, and *te eorles*). In the Ormulum and the Cotton MS. of Cursus Mundi, this assimilation is seen in all the words of the *th* group (Orm. *þatt tāt te godd-spell menepþ, wroht tāt boc, and tāt te folc all þess te bett, Cursus*, ne was *ter*, here and *tare*, scho serued *tarm*, als *sais te* sau). So in Ancr. Riwle (and *ter* is, et *terse* uerse, *þeo bet tāt doð*, and *ter oðer*, etc.). In the course of the 14th c., this assimilation was given up, and the spirant reappeared (as *ð*).

(4) In the Runic alphabet (*futhorc*) the breath spirant had to itself a symbol þ or p (called *thorn*); but in the earliest known OE. writings in the Roman alphabet this was represented by *th*, the voiced spirant being often represented by *d* (ð) (sometimes by *th*). Before 700 probably, the character ð, formed by a bar across the stem of *d*, was introduced, it appears in a charter of Wihthæd, king of Kent, 700-715 (Sweet *Oldest English Texts* 428). Apparently it was first used to denote the voiced spirant: see the proper names in the Moore MS. of Bæda, c. 737, and the *Liber Vale*, Cott. MS., c. 800, and charters before 800 generally. But in the ninth century it was used for both spirants, as in the Vespasian Psalter, c. 825 (e.g. iv. 5 *ða ðe cweoðað*), and in a West Saxon charter of 847 (O. E. T. 433). Somewhere about 800 apparently, the thorn, þ, was adopted from the Runic futhorc, the earliest charter showing it being one of Coenwulf, king of Mercia, of 811 (O. E. T. 456); but it was not much used till late in the 9th c. A Surrey charter a. 889 (ibid. 451) has 34 examples of ð initial, and 25 medial or final, with 49 of þ initial, and 1 medial. From the later years of the 9th c. ð and þ were used promiscuously in West Saxon works, with some preponderance of þ initially and ð finally. This continued in ME. till the 13th c. On the other hand, the Durham *Riuals* and the Lindisfarne

Gospel Gloss, c. 950, have uniformly ð in all positions (except in the compendium þ for *ðet*), as has also the East Anglian *Genesis & Exodus*, c. 1250; while the Mercian portion of the Rushworth Gospel Gloss, c. 975, and Ormin, c. 1200, have only þ. After 1250 the ð speedily became obsolete; þ remained in use, but was gradually restricted more or less to the pronominal and demonstrative words. In later times its MS. form approached, and at times became identical with, that of *y* (the latter being sometimes distinguished by having a dot placed over it). As the continental type used by Caxton had no þ, its place in print was usually supplied by *th* for both sounds and in all positions. But in Scotland, the early printers, especially in the demonstrative and pronominal words, continued the þ as *y*, as in *y^e, yis, yat, you* (= thou), a practice also common in England in MS., and hardly yet extinct. Confusion with the modern *y* consonant, ME. *ȝ*, was avoided in Scotland, sometimes by writing the latter *yh*, but usually by continuing ME. *ȝ* in the form *z* or *ȝ*, so that *ye zair* stood for *þe zair*, i. e. *the year*. It is remarkable that, when OE. þ and ð were both in use, no attempt was made to differentiate them as breath and voice spirants, and app. no serious attempt even to distinguish them as initial and medio-final, as was done in Norwegian when the Roman alphabet was adopted, c. 1200, and in Icelandic before 1300. At an earlier date (prob. c. 800) the character ð was partially adopted from OE. in Old Saxon, and was used generally in the middle and end of words, while *th* was usual as the breath spirant initially.

(5) In a few compounds, as *anthill, outhouse, lighthouse, Chatham, Wytham, Yetholm*, etc., *t* and *h* come together but do not form a digraph; and in a few foreign words, chiefly East Indian, as *Thakoor, Thug*, *th* represents Skr. *th* or *ṭh*, the sound being a *t* or *t* followed by a slight aspiration (tʰ, ṭʰ), in Eng. commonly reduced to *t*.

In a few proper names and other words derived from or influenced by French, as *Thomas, Thompson, thyme*, *th* is pronounced as *t*; several other words were formerly so treated, and even spelt with *t*, e.g. *theatre, theme, theology, throne, authentic, orthography* *t* has become fixed in *treacle, treasure*. The late L. and Romanic treatment of *th* as *t* often led to the spelling *th* where *t* was etymological, as in *Thames, Sathan; t* in *amananth, amanthus, anthor*, etc., the corruption has also affected the pronunciation. See the individual words. In some ME. MSS. *th* frequently appears for *t* or for *d*, e.g. *tho to, thyll till, myghtly might, nyghtly night, whythe white, thede deed, theer deer, thegrees degree, theparlyth departed, tho do, thogh doth, abothe abode, groundeth grounded, rolooth y-clothed, lowthe loud, rothet rood, wither under*. Early ME. scribes (prob. Norman) often confounded the English letters þ (or ð) and *ȝ*, writing e.g. *ȝefunge for þefunge, thieving, unȝ, uoȝ, uroȝ for uif, uroȝ, uroȝ* (in Auchinleck MS. of *Flouris* and *St.*).

(6) Etymologically, modern Eng. *th* (ð) often represents an OE. *d*, esp. before *r* or *er*, as in *father, mother, gather, hither, together*, etc.; dialectally, this sometimes extends to other words, as *bladder, ladder, soldier*; on the other hand some dialects retain original *d*, and extend it to other words, as *brother, further, rather, southern wood, wither*. In *burden* and *murder*, *d* represents the earlier ð of *burthen, murder*.

Dialectally *th* is sometimes substituted for *f* and vice versa: e.g. *thane, thich, thustolow, thral, thrae, thran, thurrow, for fane, fitch (vetch), fistula, frail (flail), frae, from, furrow*, also *filh, fursday, for thill, Thursday*. The Welsh name *Llewelyn* appears in Eng. as *Thlewelyn* (Rolls of Parl. I. 463; Edw. I. for II.) and *Fuillen* (Shaks. Hen. V). *Th* also occurs dialectally for *w*, as in *thirly, thortleberry, thort*, for *whirl, whortleberry, whol*. Conversely, *Sc.* has *whang, whang, white, whittle*, for *thwang, thwang, thwistle, thwistle*.

-th, suffix¹, a formative of sbs. a. from verbs; in some words, as *bath, birth, death, math, oath*, OTeut., repr. various Indo-Eur. suffixes, as *-ios, -ith, -is, -tus*, in which the *t* following the stressed syllable regularly became *þ* in Teutonic; in others, as *growth, stith*, going back to ON. or OE., in others, as *blowth, spith, stealth*, of later analogical formation. In many words Indo-Eur. *t* remained in consequence of its position, or *þ* was subsequently changed to *t*: see -*t* suffix³ a.

b. from adjs. (rarely sbs.), representing Indo-Eur. *-ith*, OTeut. *-ith*, Goth. *-þa*, OE. *-þu, -þo, -þ*, with prec. *t*, unlat. forming abstract nouns of state as *filth* (OE. *fylþ*, OS. *fultha* from *fūl* foul), *health, length, mirth, strength, truth*; in ME. and also in cognate langs., *dearh, depth*; of later analogical formation, *breadth, sloth* (cf. OE. *slēwþ*), *wealth*. In some words of this group, *þ* has, by phonetic causes, become *t*, e.g. OE. *hiehþu*, ME. *heirþe*, now *height*, ON. *slægh*, ME. *slaiþe*, now *sleight*: see -*t* suffix³ b.

-th, suffix², forming ordinal numbers; in modern literary Eng. used with all simple numbers from *fourth* onward; representing OE. *-þa, -þe, or -oda, -ode*, used with all ordinals except *fiftha, sixtha, ellefta, twelfta*, which had the ending *-ta, -te*; in Sc., north. Eng., and many midland dialects the latter, in form -*t*, is used with all simple numerals after *third* (*fourth, fifth, sixth, seventh, tenth, hundred*, etc.). In Kentish and O. Northumbrian those from *seventh* to *tenth* had formerly the ending *-da, -de*. All these variations, *-th, -t, -d*, represent an original Indo-Eur. *-tos* (cf. Gr. *πέμτος, L. quintus*), understood to be identical with one of the suffixes of the superlative degree. In OE. *fiftha, sixth*, the original *t* was retained, being protected by the preceding consonant; the *-þa* and *-da* were due to the position of the stress accent, according to Verner's Law.

The ordinals from *twentieth* to *nineteenth* have *-eth*, OE. *-oda, -ode*. In compound numerals *-th* is added only to the last, as 1335, the one thousand three hundred and forty-fifth part, in his one-and-twentieth year.

1 The conjunctive particle used after a comparative adjective or adverb (and sometimes after other words: see 2-4) to introduce the second member of the comparison; the conjunction expressing the comparative of inequality (cf As 3). In use it is always stressless, usually joined accentually to the *piac* word, e.g. *more than, less than, other than* (mō'-ā-dan, lē'-sān, o' bāi-dān).

The two members of the comparison are most commonly of the same grammatical form, e.g. two clauses (the latter of which may be contracted in various ways), two substantives, two pronouns, two infinitives, two adjectives, two adverbs, etc., but not invariably so: see the quotes. (Two infinitives connected by *than* in mod. Eng. either both have to or are both without it, formerly (until c.1800), esp. after *had* rather *had better*, the second infinitive often had to when the first was without it.)

Instead of *than* after a comparative, *as* (like Ger. *als*) is common in Scotland, the north of England, and in parts of Ireland and the United States, *nor* (*nar*, *ner*) appears to be dialectal everywhere from Shetland to Hampshire and Cornwall, as well as in Ireland and America (see E.D.D.), but seems never to have been literary except in Sc., where also *na* was formerly used. In Sc. the relation is sometimes expressed by *be* (= by) as 'this field is bigger be that' (Jamieson s.v. *Be*).

c. Followed by *that*, or by *whom* expressing a hypothetical result or consequence.

The modern idiom would often substitute *too* with the positive followed by the infinitive, for the comparative with *than*. e.g. in quot. 1612 'the bed is too short for a man to stretch himself'; in quot. 1693 'he is too modest to deny it'. Examples occur of a confusion of the two constructions, as 'too wise than that' or 'than to be'.

The regular modern repr. of OE þegn, if the word had lived on in spoken use, would have been *thain* (cf. *fain, main, rain*), as it actually appears in some writers, chiefly northern, from 1300 to near 1800. But *thane* was in 15-16th c. Sc. written *thane* (in L. *thane*), and this form, being used by Boece, Holinshed, and Shakespeare (in *Macbeth*), was adopted by Selden, Spelman, and the legal antiquaries and historians of the 17th c. to represent the Anglo-Saxon þegn, and became the usual form in Eng. history. Recent historians, as Stubbs, Freeman, and Green, in order to distinguish the Anglo-Saxon use from the Sc. in sense 4, have revived the OE. þegn as *THEGN*, q. v.]

3. One who in Anglo-Saxon times held lands of the king or other superior by military service, originally in the fuller designation *cynninges þegn*, 'king's thane, military servant or attendant', in later times simply *thegn*, as a term of rank, including several grades below that of an *ealdorman* or *eorl* (EARL sb. 2) and above that of the *ceorl* or ordinary freeman.

In this sense the name was superseded by *baron* and *knight* in the 12th c., and continued only in historical use, in which it was written *thane* in the 16th c. Recent historians have revived the OE form as *THEGN*.

† 8. Kindly thought or feeling entertained towards any one for favour or services received; grateful thought, gratitude. Rarely in *pl. Obs.*

The sense of 'gratitude, kindly or loving feeling for favour or benefit' must have been developed between that of 'good will, good feeling' generally, and that of 'the expression of gratitude'. But the feeling passes so naturally into its expression that it is not easy to separate them in the quotations, except by the accompanying verbs to *express one's thanks*, and the archaic to *con thanks*, ought to mean to express one's feelings of gratitude, but to give, offer, return or receive thanks, ought to mean to give or receive the expression of gratitude; so to have thanks, but this is less clear. In many instances it is impossible to say which is meant. Some of the examples given here may belong to 4.

The original plural in both uses was *þā*, in ME. *þā* and *tho*, q. v., surviving in Sc. and north. dial. as *THAE*, but superseded in literary English by *THOSE*. The demonstrative was also used in OE. as a relative pronoun, for which see below.]

(The masc. and fem. pronouns *se, seo*, and 14th c. Kentish *se, sy*, were often equivalent to 'he', 'she', and 'it'.)

B. Signification and uses.

The pronominal use goes back to the earliest OE. The adjectival demonstrative use in OE. corresponded to that of L. *is, ea, id*, or the unqualified French *ce, celle*, and is often indistinguishable from that of the modern definite article. But by 1200 the adjectival use of *that* began also to be more definitely demonstrative (= L. *iste, ille, F. ce . . . id*), and to be implicitly or explicitly opposed to *THIS* (= L. *hic, F. ce . . . ce*) As this appears first in Ormin, it may have been due to the influence of Norse, in which the adjectival use of *þat* as a demonstrative, opposed to *þetta* 'this', is of earlier appearance.

* *As simple demonstrative pronoun.*

1. Denoting a thing or person pointed out or present, or that has just been mentioned. cf. II. 1.

a. a thing (concrete or abstract)

Often serving instead of repetition of the name of the thing, and directing the attention back to it (thus more emphatic than *is*). Also, for emphasis, used pleonastically in apposition to the sb. also, in mod. use, as in quot. 1880, placed (as sub.), after the predicate sb., with ellipsis of the copula. In quot. 1905, applied to a person contemptuously spoken of as a thing or creature.

** *As antecedent pronoun*

(= *F. celui, Cel. der, derjenige*)

6. As antecedent to a relative (pron or adv.) expressed or understood

Here, and in 7 and 8 usually (as in II. 3) definitive rather than demonstrative, the relative clause (or dependent phrase) serving to complete the definition.

a. Of a thing, in general sense *that that, that which* = the thing which, what, so that *whereby, wherein, wherewith, whence*, etc.

Sometimes following the relative clause, which then begins with *what* that being in this case now pleonastic and emphatic

[a 900 tr. *Beda's Hist* III vii [iv] (1890) 178 Hwælc þæs cýninges zeleafa & modes wilsumnis in God were, þæt æfter his deaðe was gecýðed.] 13 *E. E. Allit. P. 7. With ellipsis of a following relative (suby or obj. of the relative clause) = that person or thing (sc. 'that' or 'which'). Now only where *that* is definitely demonstrative or emphatic, as in 1.

In earlier use the antecedent pronoun was omitted: see *THAT rel. pron.* 3. From the 16th c. onwards there are examples in which it is difficult to say whether the single *that* is the antecedent or the relative. Wherever it is emphatic it may be considered the demonstrative. Cf. also *THAT rel. pron.* 3 and 10.

II. Demonstrative Adjective. Pl. as in I.

1. The simple demonstrative used (as adjective in concord with a sb.), to indicate a thing or person either as being actually pointed out or present, or as having just been mentioned and being thus mentally pointed out. (Now distinguished from the definite article *THE* as being *demonstrative*, i. e. pointing out, and not merely *definitive*, i. e. distinguishing or singling out.)

The use before a possessive, as in quot 1551, is *obs* or *arch*, the periphrasis with *of* (see *OF* 44) being now substituted for the possessive.

In Sc. also referring to something mentioned immediately after, where mod Eng uses *this*. Cf I. 1, and THIS B. That (ðæt, ðet), *relative pron.* Forms: see below. [An unstressed and phonetically weakened form of *THAT dem. pron.*, used to subordinate one predication to another.

The Common Indo-Eur. had no relative pronoun, which has been developed separately in the different linguistic families. In Latin it was evolved out of the interrogative, in Teutonic chiefly out of the demonstrative. But even within the Teutonic languages the relative is differently formed (see Wright *Gothic Grammar* § 270, *Old Eng. Grammar* § 468). In mod. English it is expressed by *that*, from the demonstrative pron., and by *who* (*whom*), *which*, *what* (after L. *qui, quæ, quod*, F. *qui, que, quod*) from the interrogative pronouns. In northern dialect, ME. and mod., it is commonly expressed by *at*, *'at*, rel. pron. In OE. it was expressed (a) by the simple demonstrative *se, ðe,*

þæt; (2) by the particle *þe*; (3) by *þe* preceded by a personal pronoun or the demonstrative. For *þe*, see *THE conjunctive particle*. The use of the demonstrative as a relative appears to have come about simply by the subordination of the second of two originally consecutive sentences to the first; thus, 'he came to a river, that (or this) was broad and deep', whence 'he came to a river that was broad and deep'. In OE. it is sometimes impossible to determine whether the pronoun of the second clause is still demonstrative or has become relative. Thus the words in the OE. version of *Beda's History*, I. xii. (1890) 52 'H1 wæron Whigtgylses suna. þæs fæder was Witta haten þæs fæder was Witta haten, and þæs Witta fæder was Woden nemned', might be read either as short consecutive sentences, 'They were sons of Whigtgyls; his father [lit. that's father] was called Witta, his father was called Witta, and this Witta's father was named Woden', or 'They were sons of Whigtgyls whose father was called Witta, whose father was called Witta, and whose (Witta's) father was named Woden'. Beda's Latin has *cognis* in all three places, so that the translator apparently used *þæs* as a relative. See also Wulfing *Syntax Affreßes des Grossen* I. § 275. Now, and for a long time past, the relative *that* has been stressless, and consequently with obscure vowel, but this unstressing and obscuration came gradually, and was never represented in writing, so that in the written forms there is nothing to distinguish the relative from the demonstrative.]

B. Signification.

The general relative pronoun, referring to any antecedent, and used without inflexion irrespective of gender, number, and case.

I. 1. Introducing a clause defining or restricting the antecedent, and thus completing its sense.

(The ordinary use: referring to persons or things.) Sometimes replaceable by *who* (of persons) or *which* (of things), but properly only in cases where no ambiguity results. Cf. 2, and see *WHO*, *WHICH*, *REL.* (For ellipsis of *that*, see 3.)

E. PASCOE *Lond of To-day* xxx. (ed. 3) 269 The Westminster Hall that we now see... is the building of Richard II's time.

b. As obj. of a preposition, which in this case stands at the end of the relative clause (in OE. and ME. sometimes immediately before the verb) e.g. *the cup that I shall drink of* = the cup of which I shall drink; ME. *these that I have of told* = these of which I have told.

(When *whom* or *which* is substituted for *that*, the prep. precedes the relative.)

c. 1200 ORMIN 462 Þiss gode prest, þatt we nu mæleñn offe, Wass gehatenn Zacaryas. a. 1300 *Seven Sins* 44 in E. E. P. The hole that the mouse ran into. The town that he came from.

2. Introducing a clause stating something additional about the antecedent (the sense of the

principal clause being complete without the relative clause). Now only *poet.* or *rhet.*, the ordinary equivalents being *who* (obj. *whom*) of persons, and *which* of things.

But the relative clause is often merely descriptive, stating an attribute of the antecedent, or it may give the reason or a reason of the main statement, and thus be closely connected with it, the use in these cases approaches that in *x*. There are thus many cases in which modern use allows either *that* or *who*, *which*, and in which poets prefer *that*. (*That* as in quot. *c* 1450 is now impossible.)

3. As subj. or obj. of the rel. clause, with ellipsis of the antecedent.

a. Of things. *thæt* = (the thing) that, that which, what. Very common down to 16th c.; now *arch.* and *poetic.*, what being the prose form.

In later use the single *that* may become emphatic, and is then demonstrative with ellipsis of the relative: see *THAT dem. pron.* 7.

10. The relative is very frequently omitted by ellipsis, esp. in senses 1, 1 b (chiefly as obj. or pred., less freq. and now only in certain connexions as subj.); also in sense 7.

This (one of the commonest idioms in colloquial English, and largely found in the literary language) prob. began with the relative *þe*, THE. Cf. also *THAT conj.* 10.

1. Introducing a dependent substantive-clause, as subject, object, or other element of the principal clause, or as complement of a sb. or adj., or in apposition with a sb. therein.

The dependent clause as subject is most commonly placed after the verb and introduced by a preceding *it*, e.g. 'it is certain that he was there' = 'that he was there, is certain' see *IT 4 b*. As object, it usually follows, e.g. 'I have heard that he was there' (For ellipsis of *that*, see *10*.)

[This use of *that* is generally held to have arisen out of the dem. pron. pointing to the clause which it introduces. Cf. (1) He once lived here we all know *that*, (2) *That* (now *this*) we all know he once lived here, (3) We all know *that* (or *this*) he once lived here; (4) We all know *that* he once lived here; (5) We all know he once lived here. In 1, 2, 3 *that* is a demonstrative pronoun in apposition to the statement 'he once lived here', in 4 it has sunk into a conjunctive particle, and (like the relative pronoun) has become stressless; in 5 it has disappeared, and 'he once lived here' appears as the direct object of 'we know'. After *aware*, *certain*, *conscious*, *suspicious*, *assured*, *informed*, *persuaded*, etc., or of some other prep. seems understood before *that* 'I am certain of that, he once lived here'. But 'I am certain that' may have arisen as another way of saying 'I know that', and so of the other expressions.]

[The reduced and flexionless stem of the OE demonstrative *se, sô* (later *þe, þeo*), *þæt*, the neuter sing of which has come down as the dem. pron and adj. *THAT*. Com. Tent. and Indo-Eur. = OFris. *thê, thiu, thet*, OS. (*sa*), (*th(æ)g*), (*thi*), (*thê*), (*thæt*), (*MLG.*, MDu. *de* (*die*), *dat*, LG., Du. *de, dat*), OHG. *der* (*de*), *diu*, *daz* (mod. *Ger. der, die, das*), ON. *sá, sú, þat*, Goth. *sa, sô, þata*, also Gr. *ὁ, ἡ, τό*, Zend. *hō, hā, tat*, Skr. *sa, sá, tat*; all the inflexional parts exc the nom. sing. m. and f. having the stem *þa-*, Lith. *ta-*, Slav. *to-*, Gr. *ro-*, Zend. *Skr. ta-*, Indo-Eur. *to-*, found also in L. in *tam, tum, tunc, is-de, is-tud*, etc. The nom. sing. m. and f. in O'Ent., as in Skr., Zend, Gr., belong to another demonst. stem *sa-*, I-Eur. *so-*, found also in Ir., Gael., Gaulish *so* this, L. *se* in *sp-se*. But in OHG., OS. (in most dialects), and in late OE (10th c. in Northumbrian, and at length everywhere) the *s-* forms were superseded by forms in

þ- (OHG. *d-*), from the same stem as the neuter *þæt* and the oblique cases, as well as the pl *þá*, later *þō*, *THO*. After the middle of the 13th c the *s-* forms are no longer found, exc. as a belated survival (*se m*, *zy f*) in the Kentish dial. of the Aeyenbite (1340). The only surviving reprs of the OE. forms are *the* and *that*, Du. and LG. *de, dat*, but while LG. *dat* (besides its other uses) is still the neuter article, the Eng. *that* has ceased to be any part of the article. In the following illustration of Forms all the inflexions are illustrated, but the special history of *þæt* and *þá* pl will be found under *THAT, THO*.

(The nom. fem. *sþ, sþo* corresponds in form not to Goth. *sô, ON. sá, I-Eur. sá*, but to OS., OHG. *sia* 'she'. Some identify it with Skt. *sya* fem of the 'extended' demonstrative *sya, sya, syat*, others regard it as a special WGer. formation related to Goth. *at* 'she'.]

A Illustration of Forms.

The OE demonstrative and definite article was thus inflected.

Theanthropism (p̄ændθrɒpɪz'm), [f. as prec. + -*ISM*.]

1. **Theol.** The doctrine of the union of the divine and human natures, or of the manifestation of God as man, in Christ.

1817 COLERIDGE *Biog. Lit.* xxiv (188a) 301 Speaking theologically and impersonally, i.e. of Pantheism and Theanthropism as schemes of belief. 1867 WESTCOTT in *Contemp. It proclaims not a conception of God, but a manifestation of God. 1875 LACHTACOTT *Comm. Col.* (ed. 2) 129 The monotheism of the Old Testament is supplemented by the theanthropism of the New.

2. **Mythol.** The attribution of human nature or character to the gods.

Cf. ANTHROPOCRISM, which word Mr. Gladstone, writing to the Editor in July 1883, said he had given up and had 'taken refuge in theanthropism'.

The taking of some payment from a thief to secure him from legal prosecution; either the receiving back by the owner of the stolen goods or of some compensation, or the taking of a bribe by a person who ought to have brought the thief to justice.

Nichols (1865) in *Britton*, in note to quot 1292, suggests that the word 'originally signified the legal bote or composition for theft', and was then 'applied to the illegal compounding of theft, or taking money to maintain or connive at such offenders'. But all our quotations refer to illegal payment, a form of compounding a felony.

Thegn (*þēn*). *Hist.* A form used by some recent historians to represent the OE. *þegn* (*þegen*, *þēn*), *THANE*¹, in its sense of tenant by military service, and as a term of rank below the *ealdorman* or *eorl* and above the *eorl*, corresponding in its various grades to the post-conquest *baron* and *knight*.

The purpose of this spelling is to distinguish the Anglo-Saxon from the Scottish use of *THANE*¹ (sense 4), made familiar by Shakespeare.

Theodolite (θῑοδολίτῑς) Forms 6-7 theodolites, 7 theodolite, -dolit, -dolt, 8-dolat, 7-theodolite [Origin unknown: see Note below.]

A portable surveying instrument, originally for measuring horizontal angles, and consisting essentially of a planisphere or horizontal graduated circular plate, with an alidade or index bearing sights; subsequently variously elaborated with a telescope instead of sights, a compass, level, vernier, micrometer, and other accessories, and now often with the addition of a vertical circle or arc for the measurement of angles of altitude or depression.

The original *theodolitus* of Digges was for horizontal angles only, and many quotes, down to 19th c. use the name in this sense, Digges also describes a compound instrument having also a vertical semicircle for taking altitudes, but he calls that his *topographical instrument*, restricting the name *theodolite* to the horizontal circle.

1571 Digges *Pantome* i. xxvii. H. 117, The composition of the instrument called Theodolitus. It is, but a circle divided in 360 degrees, or a semicircle parted in 180 portions, and every of those divisions in 3 or rather 6 smaller partes.

The index of that instrument with the sights &c. are not unlike to that which the square hath. In his backe prepare a vice or screw to be fastened in the top of some staffe. *Ibid.* i. 17, [In the figure] GEFO [sic] Theodolitus, GF his *Alidada* or index with sights. *Ibid.* xxix. 17 b, Describing also within the same square the Planisphere or circle called Theodolitus. 1607 J. NORDEN *Surrey Dial* iii. 127 It [Circumferentor] is a new name given to the very Theodolite, used in a sort otherwise then the Theodolite. 1611 A. HORPOT *Speculum Topogr.* vi. 27 The Theodolitus is an instrument consisting of a Planisphere and an Alidada. *Ibid.* Table Dd 2b, To take a plat at one station by the Theodolite. 1669 STURMY *Mariner's Mag.* ii. 46 Any Instrument, as the Plain Table, the Theodolit or Circumferentor. 1701 MOXON *Math. Instr.* 20 Theodolite, a whole Circle made of Brass, containing 360 degrees, diagonally or otherwise divided, with an Index and sights moving on the Center, and a box and Needle in the middle. 1790 ROY in *Phil. Trans.* LXXX 136 It is a brass circle, three feet in diameter, and may be called a great theodolite, rendered extremely perfect. 1833 HÄRSCHEL *Astron.* ii. § 155 The zenith sector and the theodolite are peculiar modifications of the altitude and azimuth instrument.

1841 PENNY *Cycl.* XXIV 314/2 Theodolite, or Theodolite the name generally given to the instrument used for measuring horizontal angles. [*Ibid.* 315/2 The problem is to measure the horizontal angle between two objects. *Ibid.* 316/2 If the vertical angles are to be measured as accurately as the horizontal angles, the instrument becomes an altitude and azimuth circle.] [Cf. **ALTIZIMUTH**.]

b. *attrib.* as theodolite-goniometer, a goniometer with horizontal and vertical graduated circles; theodolite-magnetometer, an instrument for measuring magnetic declination, and for observations of magnetic force, theodolite-needle, the needle of the compass of a theodolite.

1820 SCOTTESBY *Acc. Arctic Reg.* i. 333 A theodolite needle, performed ten vibrations in sixty seconds. 1877 KNIGHT *Dict. Mech.*, Theodolite-magnetometer. 1909 *Cent. Dict. Suppl.*, Theodolite-goniometer.

Hence **Theodolitic** a., of, pertaining to, done or made with a theodolite (Webster 1864).

[Note. The name, alike in the Latinized form *theodolitus* and the vernacular *theodolite* (subseq. -dolite), originated in England, and is not known in French and German until the 19th c. Its first user, and probable inventor, L. or T. Digges, has left no account of its composition, as to which various futile conjectures, incompatible with its early history and use, have been offered; such is the notion that it arose in some way out of *alidada* or its corruption *alidada* occurring in Bourne's *Treasure for Travellers* 1576, which an examination of the works of Digges and Bourne, where both words occur in their proper senses, shows to be absurd. *Theodolite* has the look of a formation from Greek; it can have been (like many modern names of inventions) an unscholarly formation from *θεοδοσία* 'I view' or *θεωδία* 'behold' and *λίθος* 'visible, clear, manifest', with a meaningless termination?]

[Note Gr θεολογία meant 'an account of the gods, or of God (whether legendary or philosophical)'. Varro, following the Stoics, distinguished three kinds of *theologia*, mythical, natural (rational), and civil, the last being the knowledge of the due rites and ceremonies of religion. This threefold division is referred to also by Tertullian and St. Augustine. In Christian Greek, the vb. θεολογέιν was used = 'to speak of as God, to attribute deity to', whence θεολογία had the specific sense of 'the ascription of a divine nature to Christ', in contrast to *οικονομία*, the doctrine of his incarnation and human nature. Another patristic Gr. use, arising out of the primary sense, was 'the account of God, or record of God's ways, as given in the Bible', whence the late Gr. and med. L. use of *theologia* for the Scriptures themselves. In the 12th c. (1121-40) Abelard applied the term to a philosophical treatment of the doctrines of the Christian religion, which, though at first strongly condemned, became current, and, in this sense, 'theologia' came to designate a department of academic study, the text-books of which were the Bible and the Sentences (from the Fathers) of Peter Lombard. Hence the earliest Eng. use (The passage from Gower in sense 3 is derived ultimately from Aristotle's division of the theoretic forms of philosophy into *μαθηματική*, *φυσική*, *θεολογική*, the last being what we should call metaphysics, which included his doctrine of the divine nature.)]

Theosophy (*θῆσῶφῆ*). [ad. med. L. *theosophia* (Scotus Erigena a 880), a. late Gr. *θεωσοφία* (a 500 Pseudo-Dion. *Myst. Theologia* i. § 1) wisdom concerning God or things divine, abstr. sb. from *θεωσοφός* **THEOSOPH** So *Fr. théosophie* (18th c. in *Littre*)]

The word was revived early in the 17th c. in Latin and vernacular forms, to denote a kind of speculation, such as is found in the Jewish Cabala and is illustrated by the writings of Cornelius Agrippa (1486-1535), Paracelsus, Robert Fludd, and others, which sought, usually by the doctrine of the macrocosm and microcosm, to derive from the knowledge of God contained in sacred books, or traditions mystically interpreted, a profounder knowledge and control of nature than could be obtained by the methods of the Aristotelian or other current philosophy. The name *theosophy* was often applied specifically to the system of Jacob Boehme (1575-1624), which, though not claiming to the same degree traditional authority, was largely expressed in language borrowed from writers of the school in question. The word has then and since been applied to more ancient and more recent views having more or less affinity to those already mentioned.

1. Any system of speculation which bases the knowledge of nature upon that of the divine nature often with reference to such authors as those above mentioned, and more particularly to Boehme.

2 Applied to a system of recent origin, resembling the above in its claim to a knowledge of nature profounder than is obtained from empirical science, and contained in an esoteric tradition of which the doctrines of the various historical religions are held to be only the exoteric expression. 4. Used unemphatically to introduce a sentence or clause in which, for the sake of emphasis or preparing the hearer, the verb comes before its subject, as *there comes a time when*, etc., *there was heard a rumbling noise*. In interrogative sentences *there* comes between the verb and subject, as *Breathes there the man*, etc., or follows the first word of a compound verb, as *Does there breathe a man?*, *Shall there be any notice taken of it?* The same order was formerly observed after an introductory adv. or clause, as *Then came there a voice*, *Soon shall there arise a prophet*.

Grammatically, there is no difference between *There comes the train* and *There comes a time when*, etc.; but, while in the former *there* is demonstrative and stressed, in the latter it has been reduced to a mere anticipative element occupying the place of the subject which comes later. Preceding or following a main verb, or following any verb, *there*, thus used, is stressless (prothetic or enclitic) e.g. *there-came*, *breathes-there*, *it's there*, *we'll there*, but preceding

be or an auxiliary, *there* has a slight stress, and the verb is enclitic (e.g. *there's it*, *there's it was*, *there's it will*)

Thermometer (p̄smōmētēr). Also 7 -trē. [mod. f. Gr. *θερμῶν* heat, *μέτρον* hot + *μέτρον* measure. see -METER. In F. *thermomètre* (1624).]

The name *thermoscopium* appears somewhat earlier: see THERMOSCOPE.]

An instrument for measuring temperature (see TEMPERATURE 7) by means of a substance whose expansion and contraction under different degrees of heat and cold are capable of accurate measurement.

For the history of the instrument and its names, see H. C. BOLTON *The Evolution of the Thermometer* (Easton Pa. 1900), RENOU *Hist. du Thermomètre* (Versailles 1876), BUCKHARDT *Zur Geschichte des Thermometers*, 1902.

The earliest form was an air-thermometer invented and used by Galilei a 1597, for indicating the temperature of the atmosphere; alcohol thermometers were used c 1650, the device of a fixed zero (or the freezing-point) was introduced by Hooke, 1665. The fixing of the zero at an arbitrary point below the freezing point is attributed to FAHRENHEIT of Amsterdam, who made mercurial thermometers c 1720, and his scale has been in general use in England since c 1724. The zero of REAUMUR (1730), and of the CENTIGRADE thermometer of Celsius (1742), now largely used in science, is (like that used by Hooke and Sir I. Newton) the freezing-point. The ordinary form is now a slender hermetically sealed glass tube with a fine bore, having a bulb at the lower end filled with mercury, or with alcohol or other liquid, and adjusted to a graduated scale; variations of temperature being indicated by the varying heights of the column of liquid in the tube, due to its expansion and contraction. *Air, Centigrade, Clinical, Differential, Fahrenheit, Gas, Maximum, Minimum, Réaumur, Register thermometer*, see the first elements. *Metallic (or bimetallic) thermometer*, a thermometer which indicates temperature by differential expansion and contraction of composite metal bars.

Therology (θῆρολογία), *f.* [f. *Thero-* + *-logy*. Proposed as a substitute for the irregular but established *mammalogy*.] The science of beasts or mammals; mammalogy. Hence **Therologic** (θῆρολογικ), **Therological** *adjs.* of or pertaining to therology, mammalogical, **Therologist**, one versed in theriology, a mammalogist.

So **Theromorphia** *a.*, **Theromorphous** *a.*, belonging to or having the characters of the *Theromorpha*.

Theromorpha (θῆρομορφή), [mod. *L. a. Gr. θηρομορφή = θηριομορφή*, f. *θηριόμορφος* having the form of a beast. See prec.] (See quot. 1890.) So **Theromorphia** *a.*, of or pertaining to *theromorpha*; **Theromorphism** = *theromorpha*.

Thesē (θῆς), *dem. pron. and adj. (plural)*. Forms: see below. [This word has a complicated history. The OE. pl. of *ðes*, *ðeos*, *ðes*, was *ðas*, less commonly *ðās* (i-*O*-Tent. **þai-se*, *-sē*), dat. *ðisum*, *ðis(s)um*, gen. *ðissa*, *ðissa*. The form *ðas* remained in ME. as *þas*, which was duly retained in the north, and by regular phonetic development became *þas* in midland and south. The OE. *ðes* gave ME. *þes*, *þēs*, *þeos*, and their local variants, including s. w. *þus*. A frequent form of *þes* from the 12th to the 16th c. was *þis*, identical with the sing. see *y* below. The two forms *þes* and *þis* became differentiated in use after 1250-1300, *þes* and its variants remaining in the south as plural of *THIS*, while *þas* became synonymous with *þis*, the plural of *se*, *sēo*, *þæt*, *THAT*. This was prob due to assimilation, *þes*, *þis*, etc. being more like the singular and the dat. and gen. pl., while *þas* was in vowel like *þat* and *þā*. Apparently the assumption of *þas* as pl. of *þat* began in the north, and slowly spread to the south in the form *þōs*. see *THOSE*. But from the 12th c. there was evidently a tendency in the midl. dialects to differentiate the plural of *this* by adding *-e*, as in the plural of *adjs.* (*al*, *alle*, *sum*, *sunne*, *his*, *hise*, etc.), so that from c. 1200 to 1500 a frequent midland form was *þus-e* (2 syllables in *Orm*, etc.), in e. midl. also *þese* appears c. 1200. Even the s. w. *þus* varied with *þuse*. Of all these varieties, *these* was the survivor. Also, of *thō* and *thōs*, the two plurals of *that*, the former was finally dropped in the course of the 16th c.; so that there now remain in standard English only the two forms *these* and *those* (*thoos*, *thōs*)—both in their origin plurals of *this*; the original plural of *that* being lost in standard English, though in Scotland and the northern counties of England it survives dialectally as *thae*, *thia*, *theca*: see *THAE*. In the same district *these* has been superseded by *THIR* (*thur*, *thor*). (The original pl. *þas*, *þōs* is treated under *THOSE*, to which it belongs in form, though in meaning it belongs here.)]

Thesis (pasi, pe sis). Pl. theses (pasi:z) [a Gr. *thesis* putting, placing, a proposition, affirmation, etc., f. root *the-* of *ti-thē-vai* to put, place]

I. In *Prosody*, etc.: opposed to *ARSIS*.

1. Originally and properly, according to ancient writers, The setting down of the foot or lowering of the hand in beating time, and hence (as marked by this) the stress or *ictus*, the stressed syllable of a foot in a verse; a stressed note in music.

[1855 *WEIL & BENLOWE Théorie générale de l'accentuation latine* 98 1861 R. *WESTHAL Fragm. der griech. Rhythiker* 98 1880 P. *PIRASON Métrique Naturelle du Lang.* 32] 1864 *HADLEY Ess.* (1873) 81 The name *foot* for rhythmic elements, *arsis* (raising of the foot), *thesis* (setting down of the foot), have primary reference to orchestric. 1891 *Cent Dict. Thesis* . . In musical rhythmic, a heavy accent, such as in beating time is marked by a down-beat

2. By later Latin writers (e.g. *Martianus Victorinus* a 400, *Priscian* c 500) used for the lowering of the voice on an unstressed syllable, thus practically reversing the original meaning, hence in prevalent acceptance (from the time of Bentley, 1726) The unaccented or weak part of a foot in verse (classical or modern), or an unaccented note in music

Other writers on metres, together with ancient musicians, call that thesis which we call *arsis*, and that *arsis*, which we call *thesis* 1844 [see ANACRUSIS] 1846 *KIGHTLY Notes Virg. Bucol* 1 47 (Fortunate sēnex, ergo tū rui mānēbō!) He [Wagner] adds, that the emphasis should therefore be on *tua*, and not on *manēbō*. II. In *Logic, Rhetoric*, etc.

4 A proposition laid down or stated, esp. as a theme to be discussed and proved, or to be maintained against attack (in *Logic* sometimes as distinct from *HYPOTHESIS* 2, in *Rhetoric* from *ANTITHESIS* 2); a statement, assertion, tenet.

In Ps. lvi. 9, the two 12th c. Anglo-Norman Psalters (ed. Fr. Michel, 1860, 1876) render *ramnus* by *groseller*, *groselle*, gooseberry, and this identification is found in some ME glossaries, and was also adopted by Theodore Gaza, c. 1450. Cf. also *FEABERRY*, *DAIBERRY*, possibly dialectal alterations of the berry from *thethorn*.

They (ðei), *pers. pron.* Forms: see below [Early ME. þei in Ormin þejz]. a. ON *þei-r*, nom. pl. masc. of the simple demonstrative *sá, sú, þat* (= OE. *þá, ME. þā, þo*), which in ON. filled the place of the lost plural of the 3rd pers. pron.: cf. Norw., MSw., Sw., MDa., Da. *de*, 'they'. In OE. the 3rd pers. pron. had its own plural *hit, hie, hig, heo*, which continued in extreme southern dialect to about 1400, and in the oblique cases a century longer see *Hi²*, *HEM pron.*, *HER poss. pron.* But even in OE. the function of *hit* was largely shared by the pl. demonstrative *þa* 'those', ME. northern *þā*, midl. and south. *þo*: see *Tho dem. pron* 1 The Trin. Coll. Homilies, c 1200, have both *he* and *þei*, but only *hem*, *her(e)* for 'them, their'. Ormin, c 1200, has always *þejz* in the nom, but often *hemm* and *heore*, *here*, beside *þejzm* and *þejzre*. Between 1200 and 1500 the Norse forms gradually displaced the original pronominal: in Causton's earlier works we find *ther*, *hem*,

hir, and in the later *thei*, *theim*, *their*. See *He*, *Hi²*, *Tho dem. pron*]

(*Thick* (ðik) is in dialect use from Cornwall and Hants to Worcester and Hereford; and also in Pembroke, Glamorgan, and Wexford. In many parts it has also the form *thickey, thuckee, or thicka*. It generally means 'that', but in some parts 'this', in which case it is contrasted with *thuck, thock, or thack* = that. It is sometimes indefinite, and has to be made definite, as *thuck here, this, thick there, that*. In Somerset and Dorset, *thuck* and *thease* are used only of individual shaped things, as a man or tree, while *thack* and *thuse* are used for less substantial things as mass, as flour, milk, marble. Although in Gothic and all the Teutonic langs. *þynkjan* is inflected as a weak verb, with forms parallel to those of *þanjan* (*THINK* v. 2), it is generally held to have been originally a strong vb., the present stem of which was formed with -ja suffix, like **þagan*, **stytan*, etc., on the weak grade of an original ablaut series **þyjk-*, **þayk-*, **þynk-* (see *THINK* v. 2), which subseq. passed into the first class of weak vbs (cf. *þakjan*, *brāhtie*, *bugjan*, *bauhtie*, etc.). In OE, as in the cognate langs., the forms of this vb and 'THINK v. 2' remained quite distinct, but in ME, owing to the fact that both *þync-* and *þen-* gave ME. *þynk-*, and both *þūht* and *þōht* appeared in ME. as *þouht*, *thought*, they became confused and finally fell together. The contiguity of sense also helped see *THINK* v. 2.]

In form, a factitive vb. f. *þenk*, strong grade of ablaut series *þenk-, þenk-, þenk-*. —pie-Tent *teng-, *long-, *teng-. cf. THINK v.1 The original meaning may thus have been 'to cause (something) to seem or appear (to oneself)'. In ME., *þenk* (as was normal with the groups -eng-, -enk-) became *þink*, with the result of confusing this in the present stem with the prec. vb., of which the pa t. *þuhte* was also from 13th c. written *þoughte, thought(e)*, so that the forms of the two verbs became completely identical. The practical equivalence of sense between *me thinks, him thought*, etc., and *I think, he thought*, etc., also contributed to this result, there being no difference of import between 'such compani as him thought' [= OE. *him þuhte*] competent' (see THINK v.1 B. 2 a) and 'such compani as he thought' [= OE. *he þuhte*] competent']
